

Inorganics, solutions and auxiliaries

109257 CombiCoulomat fritless Karl Fischer reagent for coulometric water determination for cells without diaphragm Apura

Formula Hill

Chemical formula

Molar mass

Density ~ 0.92 g/cm³ (20 °C)

pH value

Form liquid

Color yellowish

Odeur of methanol

Melting point

Boiling point 70 °C

Vapor pressure

Solubility in water (20 °C) partially soluble

Explosion limits

Solubility in ethanol

Flash point ~ 12 °C

Solubility in chloroform

Thermal decomposition

Water absorbtion

Heat of evaporation

Saturation conc. (air)

Evaporation number

Dielectric constant

Ignition temperature

Dipole moment

Bulk density

Viscosity dynamical

Refractive index

Viscosity kinematical
