

## Organics, synthesis and cleaning agents

## 814848 2-(1-Cyclohexenyl)-ethylamine for synthesis

Formula Hill  $C_8H_{15}N$ 

Chemical formula

Molar mass 125.22 g/mol

Density 0.899 g/cm<sup>3</sup> (20 °C)

pH value

Form liquid

Color colourless to yellow

Odeur

Melting point

Boiling point 53 - 54 °C (3.33 hPa)

Vapor pressure

Solubility in water

Explosion limits

Solubility in ethanol

Flash point 57 °C

Solubility in chloroform

Thermal decomposition

Water absorbtion

Heat of evaporation

Saturation conc. (air)

Evaporation number

Dielectric constant

Ignition temperature

Dipole moment

Bulk density

Viscosity dynamical

Refractive index

Viscosity kinematical
